

# Vertices®

The Smarter Way to Control Your Data.

Vertices® is the comprehensive tape management software solution that gives you complete control over all the media in your company with a single, easy-to-use application.

Vertices tracks media at all your storage sites, monitors usage and movements, creates and automates rotation cycles, and virtually eliminates the risk of accidental erasure of important information. And since Vertices captures tape information from your backup system automatically, total accuracy becomes the standard, not a goal.

Plus, you can even log mainframe media from your BL/LIB®, CA-1® or RMM system.

## **HIPAA and Sarbanes-Oxley Compliance.**

If you are concerned about complying with federal regulations, Vertices has you covered. Vertices creates a complete audit trail, allowing you to print comprehensive audit reports to help satisfy compliancy issues.

## **Handle All Your Media with One Program.**

Vertices Legacy Logger Module™ imports information into Vertices from legacy backup tape management systems, enabling you to take full advantage of Vertices' powerful and time-saving tape management features.

Vertices Foreign Media Module™ helps log and track media from outside companies, such as vendors or clients, without affecting your company's main database of media information.

## **Run Your Data Center Like Clock Work.**

Vertices FTP functionality allows you to automatically transfer action lists to offsite vendors, and other vaults, via FTP. And because Vertices can automatically generate these lists, data center personnel and storage facilities always know exactly what tapes will be arriving, as well as what tapes to ship back to the originating location.

## **Ensure Absolute Accuracy.**

Vertices Automation Module™ integrates seamlessly with your backup application, automatically logging and tracking all backup media from the following systems:

- ▶ VERITAS NetBackup™ & Backup Exec™
- ▶ LEGATO NetWorker®
- ▶ BakBone NetVault™
- ▶ HP OpenView Data Protector™
- ▶ Syncsort Backup Express™
- ▶ CA BrightStor™ ARCserve®

Vertices Bar Code Scanning Module™, with onsite and remote capabilities, virtually eliminates input errors while providing lightning-quick logging and reconciliation.
